

INTEGRATED PLAN FOR SUSTAINABILITY
**UNIVERSIDAD NACIONAL AUTÓNOMA DE
MÉXICO**

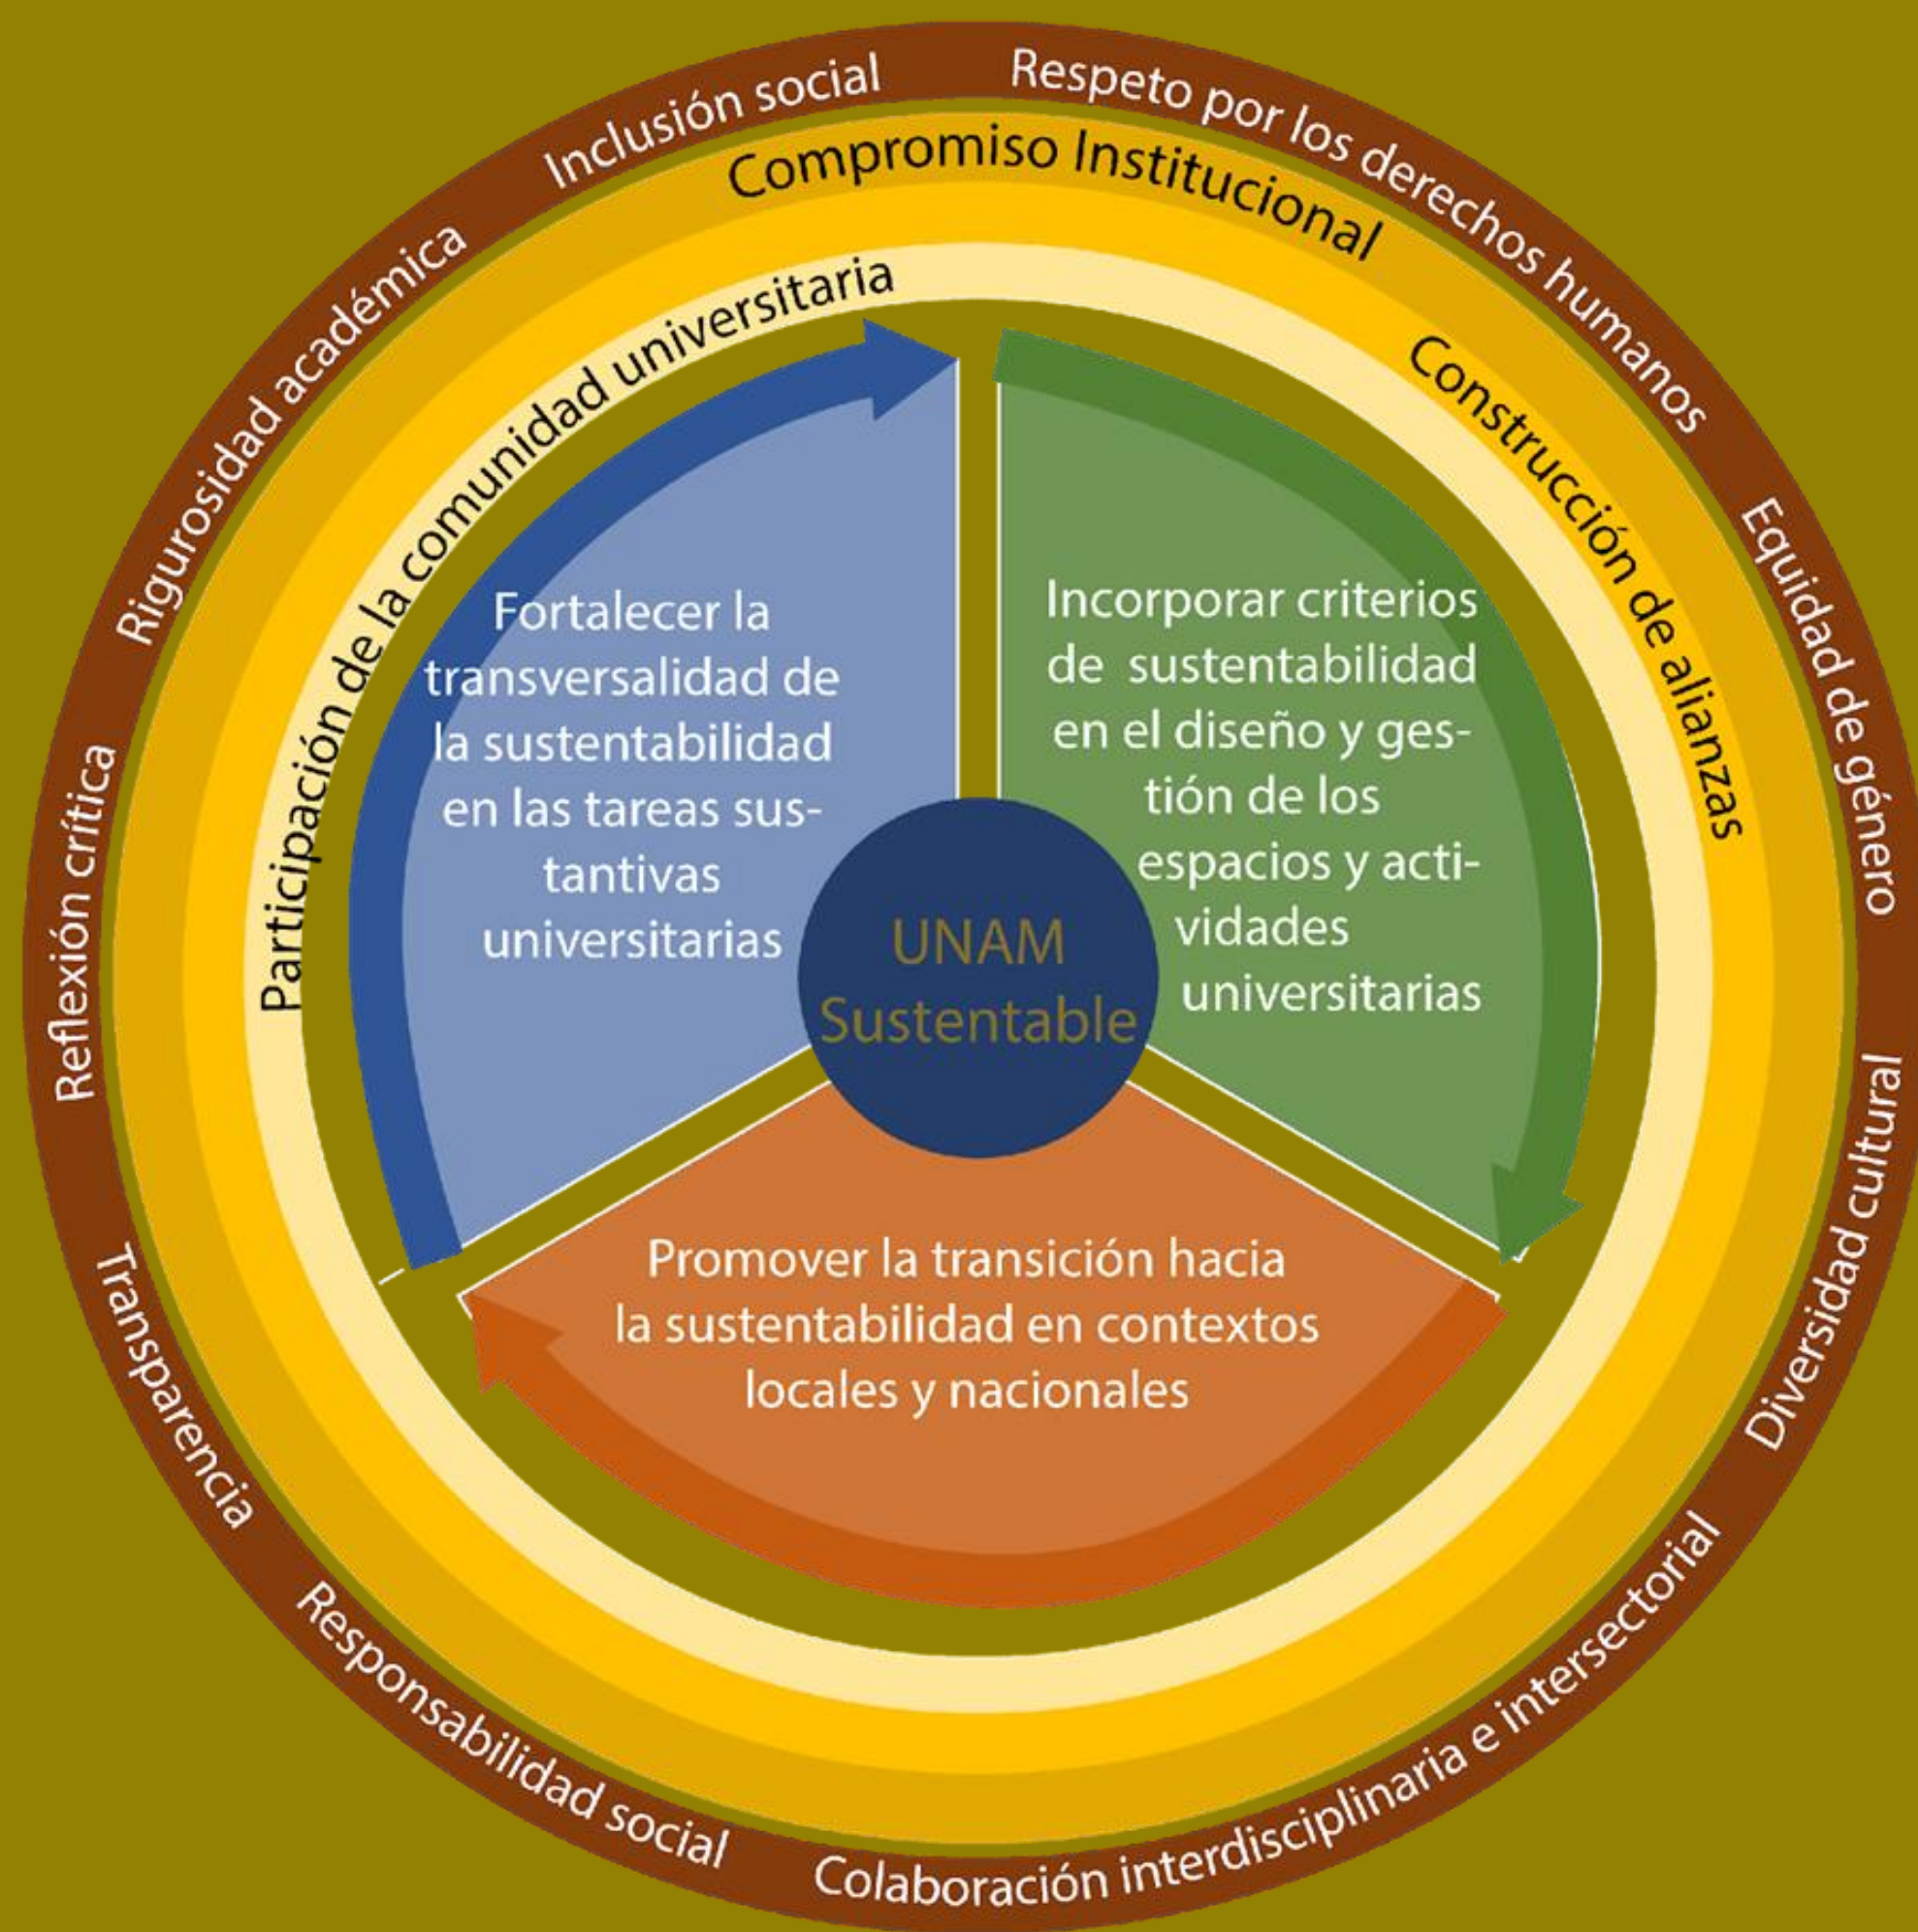

June 2022

CONTEXT

- **Socio-environmental** crisis in Mexico.
Need to build sustainability from inter and transdisciplinary work, aiming for **transformative changes**.
- **Role of universities**, and public universities in particular.
To educate actors of change, to produce strategic knowledge, to spread a culture of sustainability.
- National importance of **UNAM**.
Education, Research and Campus Management.
- Still numerous needs and areas of opportunity.

INTRODUCTION

Theme 1. To mainstream sustainability in the main activities of UNAM

1.1

To strengthen education for sustainability at all levels and modes of education.

1.2

To promote the development of research and innovation, based on inter and transdisciplinary methodologies.

1.3

To promote, among the university community and the population in general, the adoption of values which are favorable to sustainability.

Theme 2. Sustainability in UNAM campuses

2.1

To promote land use planning and management of land, green areas and natural reserves within the UNAM campuses.

2.2

To reduce energy consumption and increase the use of renewable energy at the university campuses.

2.3

To increase the efficiency of the use and the quality of water at university campuses.

2.4

To promote an efficient transport of people and objects within the campus, in terms of energy, time, safety and accessibility.

2.5

To promote institutional practices of sustainable consumption of goods and services at the University.

2.6

To promote a sustainable management of waste, from its generation to its final disposal.

2.7

To promote safe, accessible buildings that make efficient use of resources throughout their life cycle, within the campus.

Theme 3. To take part in the search for sustainability beyond the campuses (locally and nationally)

3.1

Document and analyze the most relevant socio-environmental problems and the obstacles facing the construction of sustainability conditions at different scales, promoting public discussion around them.

3.2

To disseminate initiatives for solutions to the socio-environmental problems of our country, and around the construction of sustainability.

3.3

To increase the incidence of UNAM in the design, monitoring and evaluation of public policies and normative, regulatory and legal instruments aimed at sustainability.

3.4

To promote the outreach of the university with social initiatives that work for the construction of sustainability.

3.5

To promote the participation of the university in private initiatives of sustainability.

Strategies implemented in the pursuit of sustainability at the university

A

To consolidate the institutional commitment of all UNAM's departments to make UNAM a sustainable university.

B

To promote alliances between key university actors, with the government, society and the private sector as well as with other higher education institutions around sustainability.

C

To promote and facilitate the participation of the different groups of the university in initiatives related to sustainability in and from the university.

¡GRACIAS!
